

Egress MagnaTrack

Super High Speed MagnaTrack for Egress with GAPOSA SHSMOTORS

MagnaTrack is the sole and unique system in the market with high speed rolling egress screens for use in restaurants, hotels, casinos, resorts, special event areas, and wedding venues.

The Egress MagnaTrack system is equipped with a high speed Gaposas motor that runs at 90rpm guaranteeing your emergency exit to open in seconds.

The system can automatically open in case of emergency when connected with fire alarms or any other control systems allowing dry contacts connections.

FEATURES

- Can be controlled from a regular Gaposas remote control for anytime use
- Can be connected to any alarm devices supporting dry contacts connections (dry contact transmitter is required)

PARTS

- Egress MagnaTrack roller screen (sizes are limited, for details please contact Fraser Shading Systems)
- SHSM Super High Speed Gaposas motor 90 rpm (specs attached)
- Gaposas dry contact transmitters, available in single and 6 channels (specs attached)

SIZES

- Egress MagnaTrack Systems are available in the following size ranges:
 - 6-inch Hood: WIDTH from 4 feet to 5 feet and HEIGHT from 7 feet to 9 feet (except: 5'W x 9'H);
