Fraser Shading is pleased to announce that we are now an authorized manufacturer of the MagnaTrack Motorized Screen System.

Innovative in design and revolutionary for the exterior shading industry, this fully-patented system utilizes **opposite-pole neodymium magnets** which are secured into both the track housing and the inner track.

These chrome-coated rare earth magnets have an estimated **400-year life expectancy**.
How does it work?

These specialized magnets are slightly separated, permitting the inner track to float inward during deployment. This allows the screen interlock to easily feed into the track without hang-up, jamming, or pull-out!

In addition, the magnetic pull also keeps the screen panel taught when the screen is deployed.

There is NO other system that has this Patented Technology or performance...guaranteed!

Introduction

Welcome to the MagnaTrack Pricing Reference Guide. These are suggested Retail Prices for our various products. Every effort has been made to be accurate and correct, and we remain vigilant ensuring that you get the best possible service and products. Please refer back to us for current prices and compare your expected prices to our quotations. The quotations will include the accurate pricing at the time. All prices are subject to change, and we reserve the right to change without notice.

How to determine prices:

This Pricing Guide is provided as a tool to make field pricing easy. In order to determine your price, follow these simple steps:

1. Choose the type of shade
 - a. MTD – Residential with Insect or Solar
 - b. MTC – Commercial with Clear Vinyl Windows
 - c. Triangular Fixed Track
 - d. Rectangular Fixed Track
2. For ease of formatting the grids run opposite to most window covering grids, height is across the top and width is down the side. Using the chart for the selected system, identify the width row and then the height column. You must round up if your exact measurement is not listed.
3. The price in that position is the Retail List Price for the shade for full shade assembly. Controls, remotes, upgraded motor options, special vinyl window configurations and any other specialty items are not included.
4. Add the remotes, controls and other specialty items you desire.
5. Add shipping costs – shipping is not included in the price, as these are oddly sized items for shippers, shipping costs can vary widely depending on the size and quantity of any specific order.
6. Any orders for a quantity of two or less MagnaTrack units will be subject to a \$100 packaging fee.
7. Due to ongoing volatility in the international tariffs, we will be implementing a 3% surcharge on all orders received on or after **August 8, 2025**. This surcharge will be in addition to any existing surcharges and is necessary to help offset fluctuations and tariffs that continue to impact our industry.

NOTE: All prices are in Canadian dollars and have been calculated at a 30% exchange rate. Significant movement in the exchange will affect the pricing in this guide. (See example chart below)

USD = 1.15 to 1.1999 Cdn\$ - use this price guide less 6%

USD = 1.20 to 1.2499 Cdn\$ - use this price guide less 3%

USD = 1.30 to 1.3499 Cdn\$ - use this price guide as is

USD = 1.35 to 1.3999 Cdn\$ - use this price guide plus 3%

USD = 1.40 to 1.4499 Cdn\$ - use this price guide plus 6%

If the exchange rate goes beyond these ranges a new price guide will be issued

Example: *If the exchange rate is at 1.22 USD to Cdn\$ you would subtract 3% from the price.*
