

# Sidekick for SHADES Gen 2

## Universal Shade Remote Control

model number: SKS-500

### The Quick Story

- ✓ Works with multiple motor technologies
- ✓ 5-channel or 1-channel control
- ✓ Pairs directly with the shade
- ✓ Wireless control via RF
- ✓ 10-year battery life
- ✓ Flush mount: Install with or without a workbox
- ✓ Provides State feedback to the Bond Bridge Pro
- ✓ Set up shade limits  
*No manufacturer remote required*

### The Whole Story

Sidekick is the only keypad in the industry that can communicate directly with multiple motor technologies, such as; Somfy RTS, Rollease ARC, Dooya, AMP Motorization, and more. By doing so, it provides direct, individual, and group control with no advance planning or wiring required.

When used with the Bond Bridge Pro, Sidekick is capable of showing the correct open/close state of the shades and can also work in Relay Mode, where commands are sent by the Bond Bridge Pro (instead of Sidekick), extending the technologies it supports, its range and battery life.

### Sidekick Gen 1 vs Gen 2

	Sidekick Gen 1	Sidekick Gen 2
